DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-24 rejected under 35 U.S.C. 102(b) as being anticipated by Mandler, US 5,732,400.

Mandler discloses a credit management system and method for online purchases of goods including a seller computer 11, a buyer computer 21 and a finance server 41. The electronic commerce includes catalog services, credit limits and credit, e.g. col. 3, lines 6-12, 31-65; cols. 6-7, lines 44-15. Also, information regarding the buyers is gathered, e.g. cols. 5-6, lines 60-21.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Walker et al., US 6,088,686.

Walker discloses an on-line based purchasing system, e.g. 14, 16, analyzing credit information for the purchase of products, e.g. col. 2, lines 1-37, cols. 6-7, lines 1-29, cols. 11-12, lines 65-33, col. 13, lines 2-43, including an applicant's buyer computer. Walker does not specifically disclose a web server. It is noted that financial web servers and associated software have been common knowledge in the electronic commerce art and have been inherent features with on-line purchasing systems. To have provided financial web servers and associated software for Walker would have been obvious to one of ordinary skill in the art. The motivation for doing such would have been to incorporate common knowledge computer accessories for conducting electronic commerce.

5. Further pertinent references of interest are noted on the attached PTO-892.
